EDUCATIONAL OBJECTIVES

Upon completion of this educational activity, participants should be able to

- Evaluate new technologies that improve the ophthalmologist's ability to diagnose ophthalmic diseases and conditions.
- Describe state-of-the-art surgical and medical treatments for corneal and external diseases of the eye.
- Apply improved surgical techniques for the management of uveitis and glaucoma.
- Explain various treatment modalities for common intraocular cancers.
- Discuss the latest advances in intraocular drug delivery systems.
- Relate challenges in medical practice and competent patient care to the medical and surgical management of glaucoma.
- Explain current trends in access, quality, and cost facing health care in America.
- Appropriately evaluate competence and ethically and legally manage incompetence among physician colleagues.

The Emory University School of Medicine designates this educational activity for a maximum of **9.0** American Medical Association Physician's Recognition Award Category 1 Credits[®]. Each physician should only claim credit commensurate with the extent of his/her participation in the activity.

The Emory University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide medical education for physicians.

It is the intent of Emory University School of Medicine to assure that its educational mission, and Continuing Medical Education activities in particular, should not be influenced by the special interests of individuals associated with its programs. Having an interest in or an affiliation with any corporate organization does not necessarily influence a speaker's presentation, but the relationship must be made known in advance to the audience in accordance with the Standards of the Accreditation Council for Continuing Medical Education. Any conflicts will be disclosed prior to the beginning of the program.

CME PROGRAM CHAIR
